

The Gravity Of IT All II

This artwork highlights the crucial conversation about climate change and its importance as we journey through the cosmos on our "Earth ship." Will we take action to repair our planet, or will we stumble and fall as a species? This sculpture has an added symbolism with wood borers leaving several holes in the wood along the top edge.

Artist: Gary A Crosby M.M.M, C.D.

Medium: Mixed Media

Material Type: Butternut hardwood.

Style: Contemporary Artwork, Theme Climate Change.

Dated Dec 22 2025.
