Note: just a reminder that G
linked to that on the next
It is linked to the contour!

Carvers Pattern Explanation

Carvers Pattern view on a 2D pattern that we provide you with a perspective of the carving depth.

Side view of the carvers pattern. The idea of the H and L is to provide you with a perspective of what is required to be above and what is required to be below the pattern line. By doing this we try to provide you the carver with a 3D view and an understanding of the 3D effect that is required for this project.

Carvers Pattern Explanation

Carvers Pattern view on a 2 D pattern that we provide you with a perspective of the carving depth.

Carvers Pattern view for the 3D effect. This is the desired effect that we are looking for when doing this project. The depth is up to you. All we are doing is explaining to you the elevation change and the contours of the project.

Side view of the carvers pattern. The idea of the H and L is to provide you with a perspective of what is required to be above and what is required to be below the pattern line. By doing this we try to provide you the carver with a 2D view and an understanding of the 3D effect that is required for this project.

Note: just a reminder that the H is linked to the L on the next level and the H is linked to the contour lines
