

LETTER BOX

The Letter Box is designed to hold your standard household letters or as I call it bills and window letters. The letter box is extremely easy to construct and can be wood burned-painted or carved by hand or with a router.

This Free Pattern is designed to be spread around as much as possible. So feel free to pass this PDF file around. All I ask is that you do not sell this pattern for profit and or in any way make money from the pattern or charge money to assess this pattern
