Artist Statement:

“River Run” is a dynamic visual art sculpture designed to evoke the playful essence of nature as it traverses the park, mimicking the upstream journey of Atlantic Salmon.

Each day, the sculpture is relocated to a new area within the park, creating a captivating and ever-changing tableau. This movement not only enhances the natural beauty of the surroundings but also invites viewers to experience the majesty of these fish as they swim gracefully through the landscape. Through this installation, I aim to celebrate the connection between art and nature, encouraging a deeper appreciation for the environment we inhabit.
