

The Monarch

Title: "The Monarch"

Artist: Gary A Crosby MMM, CD.

Medium: Wood carving, Acrylic

Material: New Brunswick Hardwood

Size: 51cm x 20cm x 2.5cm thick

Date: 29 Oct 2025

Details: In this artwork, I wanted to create a link between the Monarch Butterfly and humanity. The Monarch Butterfly is currently on the endangered species list, and if

we keep going the way we are, this will be the only way to see the monarch, as we are destroying their habitat. I know not everyone is involved in this wilful destruction, but we could all be involved in restoring their habitat. 10% of my profits will go to just that, restoring their habitat.

The monarch is an incredible butterfly. The colour and size put it apart from the other butterflies. They say that having a monarch land on you is to have a tremendous amount of luck bestowed upon you.
